

**REMARKS**

By this amendment, claims 29-31 have been withdrawn. Claim 10 has been amended to set forth TBADN as the host material and rubrene as the dopant (See Example 4, page 13).

According to the data, the temperature T for TBADN is 250 °C and the temperature for rubrene is 260 °C. These materials clearly satisfy the temperature relationship of claim 1.

Only claims 1 and 10 are now elected for further prosecution. If there is any problem with this response, the Examiner is invited to call the undersigned.

Respectfully submitted,

Attorney for Applicant(s)

Registration No. 22,363

Raymond L. Owens/das  
Rochester, NY 14650

Telephone: 585-477-4653  
Facsimile: 585-477-4646

If the Examiner is unable to reach the Applicant(s) Attorney at the telephone number provided, the Examiner is requested to communicate with Eastman Kodak Company Patent Operations at (585) 477-4656.
